Project Overview:

Project Name: ShopSmart – Digital Grocery Web Application

Project Description: ShopSmart is a full-stack web application developed using Angular, Node.js, and MongoDB that enables users to browse grocery products, add them to cart, place orders, and make secure online payments. The admin manages products, orders, and users through a dashboard.

Project Version: v1.0

Testing Period: 01 March 2025 to 05 March 2025

Testing Scope:

- User Registration
- User Login
- Product Listing
- Add to Cart
- Update Cart
- Order Placement
- Stripe Payment
- COD Option
- Admin Product Management
- Order Tracking

Testing Environment:

URL/Location: http://localhost:4200

Credentials (if required):
Admin: admin@shopsmart.com / Admin@123
User: user@shopsmart.com / User@123

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registratio n with	1. Open registration page 2. Enter valid email	User account created	User registered and	Pass

	valid data	& password 3. Click register	successfully	redirected to login page	
TC-002	Registration with invalid email	1. Open registration page 2. Enter invalid email 3. Click register	Validation error shown	Validation error shown for email format	Pass
TC-003	Login with correct credentials	1. Open login page 2. Enter valid email & password 3. Click login	User authenticated and redirected to dashboard	User logged in and accesses dashboard	Pass
TC-004	Login with wrong password	1. Open login page 2. Enter correct email & wrong password 3. Click login	Error message shown	Error message 'Invalid credentials' displayed	Pass
TC-005	View Products list	1. Go to Home page 2. Browse categories	Products should display with details	Products loaded correctly with prices and images	Pass
TC-006	View Product Details	1. Click on a product card 2. View product page	Product details page opens	Product details correctly displayed	Pass

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.

All critical functionalities tested successfully. Application ready for deployment.
